An interior design competition for a new integrated mall

The integrated mall intends to adopt the theme of "the world's famous capital cities from the 5 continents" as its conceptual design for its 5 floors.

1. America 2. Europe 3. Australia/Oceania 4. Asia 5. Middle-East/Africa

This is so that each floor becomes a slice of the world, a representative continent encapsulating the essence, the characteristics and identities of its capital cities, to bring extraordinary experiences to visitors.

Capital 21, located in Johor, Malaysia, is currently being developed by Capital City Property Sdn. Bhd.

Design Capital 21 is seeking the best of ideas from professional architects and interior designers the world over to make this vision a reality.

Competition duration: January – March 2016

Prize: USD10,000 for each winner

Join the excitement!
